## OBJECTIVE

The PortfolioMetrix Global Strategic Share Portfolio is a fully diversified, global, USD denominated share portfolio which emphasises long-term growth in capital. The portfolio sits at the top end of the risk spectrum and is exposed to both equity market risk and exchange rate volatility. The intention of the portfolio is to strategically invest in a rigorously derived portfolio that seldomly needs to be actively traded. Given this intention, valuations are important but quality is considered to be more so. Furthermore, careful diversification within market sectors still allows for a significant degree of risk management, making the portfolio an ideal vehicle for long-term wealth accumulation, however volatile returns are to be expected.
