

PORTFOLIO CHARACTERISTICS

This model portfolio seeks to provide medium to longer-term growth in capital and income whilst only assuming a moderate degree of risk. Within the range, the fund sits in the middle of the risk spectrum and invests in a healthy blend of assets. Careful diversification and risk management allow for a reasonable weight in growth assets, making it the ideal vehicle for both wealth accumulation and wealth preservation without excessive exposure to market volatility.

Experience has shown that mandates such as these have generated consistent inflation-beating returns over time and that assuming a degree of risk is a critical factor in accumulating wealth. Nevertheless, investors need to be aware that even well-diversified portfolios may produce negative returns over some periods and that investors need to demonstrate composure in the face of volatile markets.

EFFICIENT FRONTIER

REGULATORY DISCLOSURE

This model is a blend of VT PortfolioMetrix GBP Core funds, which are authorised in the United Kingdom and regulated by the Financial Conduct Authority. The VT PortfolioMetrix GBP Core funds are sub-funds of VT PortfolioMetrix GBP Funds ICVC, an open-ended investment company registered in England and Wales under registered number IC035161. Further details, including copies of the prospectus, annual reports and accounts are available free of charge at www.valu-trac.com.

DISCLAIMER

From 30 June 2021 performance, fees and yields are based on prospectively defined, fully investable targeted risk profiles implemented using a blend of the VT PortfolioMetrix GBP Core funds. Prior to 30 June 2021, performance is based on the asset allocation, funds and fund share classes historically held on the Wealthtime platform. Due to platform constraints, funds, fund share classes and asset allocations (and hence exact fees, yields and performance) may be slightly different on other platforms. Risk Score is a PortfolioMetrix measure of relative riskiness of the portfolio. 1/100 is the least risk (but not no risk) and 100/100 is the most risky. This document is only for professional financial advisers, their clients and their prospective clients. The information given here is for information purposes only and is not intended to constitute financial, legal, tax, investment or other professional advice. It should not be relied upon as such and PortfolioMetrix cannot accept any liability for loss for doing so. Any forecasts, expected future returns or expected future volatilities are not guaranteed and should not be relied upon. **The value of investments, and the income from them, can go down as well as up, and you may not recover the amount of your original investment. Past performance is not a reliable indicator of future performance.** Portfolio holdings and asset allocation can change at any time without notice. PortfolioMetrix Asset Management Ltd is authorised and regulated by the Financial Conduct Authority. Full calculation methodology available on request.

INVESTOR PROFILE

- Wish to accumulate capital and increase future purchasing power
- Prefer a moderate level of risk to the prospects of higher excess returns
- Seek a mix of income and capital growth
- Have an investment time horizon of 5 years or longer

Model Comparator	1.6%	0.9%	0.2%	3.4%	0.8%	10.7%	12.6%	51.1%	-9.7%	9.1%	4.4%	13.8%	-5.6%	62.2%	4.7%	7.7%
Relative	0.2%	0.8%	0.1%	0.7%	1.5%	0.1%	-1.6%	4.0%	-0.7%	-1.4%	0.2%	-1.2%	0.6%	1.0%	0.0%	

METHODOLOGY

Data Source: PortfolioMetrix

All returns are cumulative (unless if stated otherwise) and risk is calculated by using the weekly (Friday to Friday) standard deviation of returns, annualised. The performance composite of the profile is compiled from two sources, the first contributes performance from inception to 30 June 2021 and was based on asset allocation, funds and fund shareclasses historically held on the Wealthtime platform - this can be clearly identified in the performance chart as a thin-weight blue line. Thereafter the performance is based on the actual blend of the constituent VT PortfolioMetrix GBP Core funds, as identified by a thick-weight blue line. The Cash+ comparator is calculated using the Bank of England Sterling Overnight Index Average. The CPI comparator is the UK Consumer Price Index. The Model comparator is a blend of IA sector indices combined to give a similar risk profile to the respective model portfolio. Full calculation methodology is available on request.
